## EXPERIENCE

### Adjust

*Senior Frontend Developer, August 2021 - present*

- **Application:** Analytics platform for tracking advertising campaigns (<https://www.adjust.com>).

**What did I do:**

- Developed multiple platform partitions, including the service for the Apple SKAD Network tracking setup. The features included complex forms and data visualisation with tables and charts.
- Mentored junior and middle-level developers.
- Led initiatives for the tech stack improvement.
- Delivered technical talks for the company's frontend department.

**Technologies:** TypeScript, React, D3, SCSS, Webpack, Microfrontends.

### Ittransition Group

*Senior Frontend Developer, July 2018 - July 2021*

- **Application:** Betting web application for one of the UK leading bookmakers (<https://betfred.com>).

**What did I do:**

- Developed the lottos section, developed multiple features for the betting partition (forms, data visualisation, animations).
- Mentored junior developers, helping them grow into middle-level positions.

**Technologies:** TypeScript, React, Redux, Node.js, Docker.

### Clonfish / AST222

*Full Stack Developer, June 2013 - July 2018*

- **Application:** Platform for traffic arbitrage.

**What did I do:**

- I was the leading frontend developer (forms, data visualisation), and I also did part of the backend work.

**Technologies:** JavaScript, AngularJS, Webpack, Node.js, Sequelize, PostgreSQL, Redis.

- **Application:** Cat Pirates, a match-3 game for social networks (<https://www.youtube.com/watch?v=QrUQtbtY61o>).

**What did I do:**

- Implemented the backend of the game application from scratch as a single developer (including architecting the database).

**Technologies:** JavaScript, Node.js, Sequelize, PostgreSQL, Redis.

- **Application:** Various games for social networks (Some of the examples are <https://www.youtube.com/watch?v=7zdmnY-TYuY> and <https://www.youtube.com/watch?v=utsgqaW8i5Q>).

**What did I do:**

- Fullstack implementation of various features.

**Technologies:** PHP, MySQL, JavaScript, jQuery, Node.js, AngularJS, PostgreSQL.

## STK Group

*Full Stack Developer, July 2011 - June 2013*

- **Application:** Websites for a multi-brand car dealership.

**What did I do:**

- Built 4 websites which provided the ability to view and book available cars, book test drives, do credit calculation and contained news and special offers.

**Technologies used:** PHP, MySQL, JavaScript, jQuery.

## TECHNICAL SKILLS

Currently I actively use:

- HTML
- CSS
- JavaScript
- TypeScript
- React

- Next.js
- Jest + RTL
- Webpack
- Git
- Docker

Also proficient with:

- Node.js
- Express
- Sequelize
- PostgreSQL
- AWS

## OTHER SKILLS

- Advanced English. I have been working in English-speaking teams for over 6 years.
- Mentoring developers. I helped several junior developers to grow into middle / senior positions.
- Public speaking. Delivered multiple technical talks in English and Russian.
- Leadership. Including organizing and leading meetings, estimating, planning and assigning tasks.
- Problem solving. I identified, communicated, investigated and fixed architectural and performance issues.

## EDUCATION

*Petrozavodsk State University, 2006- 2012*

- Master's degree with honours in Information Technologies.
